

### Symptom

When logging into DAD, the following error message is displayed and the user is unable to login.

### CAUSE

As part of the DAD licence, users need this right. This message means that the current user does not have this right. This is most likely when using Windows Authentication groups.

### SOLUTION

Add the VIEW SERVER STATE right to the windows group(s) in the DAD Database. The SQL Command for this is

**GRANT VIEW SERVER STATE to [Domain\WindowsGroup]**

To allow all users, the public group can also be assigned this right.

**GRANT VIEW SERVER STATE TO public**
